User action

3

Clicks on 'sentence snaps'

User action

4

Clicks on 'add new'

System response

System response

Home screen displays where the user can choose to look at their "sentence snaps" or "mastered snaps"

System response

Sentence snaps page displays. The user can see all the sentences they have previously added, they can also see an "add new" button at the top

System response

Add new page displays. There is a form for the user to enter the details of their new entry.

User action

5

Enters sentence in English, selects language to practise in, enters translated sentence, selects difficulty level. Clicks 'submit'

User action

6

Clicks 'play' on newly added sentence

User action

7

Enters their translation of the sentence, clicks 'submit'

User action

8 End

Users entry is correct. They decide to move the sentence to "mastered snaps"

System response

After clicking submit the user is directed back to the "sentence snaps" page where their sentences, including the new entry, are stored

System response

Play page displays. The user can see their sentence in English, the language to translate it into, and a field to input their translation.

System response

The user receives feedback on whether their entry was correct or incorrect. In this case it is correct. They have the option to return to "sentence snaps" or to move their sentence to "mastered snaps"

System response

Sentence is added to mastered snaps. The user receives feedback that this has happened. They can then go 'home' go to 'sentence snaps' or go to 'mastered snaps'
